Both Propositions Urged by Chief of Bureau

WASHINGTON, D. C., December 26.—In advocating increased pay for the clerical force of the Bureau of Insular Affairs, the Department of the Interior, chief of the bureau, says: "It should require no argument to show that the present salaries of departmental employees, fixed almost sixty years ago, cannot be expected to meet present conditions, with the increase in the cost of living. Congress has recognized this increased and increasing cost of living by liberal additions to the salaries in other branches of the government, and it would seem only just that corresponding liberality should be shown in the cases under consideration. As a while some plan for the ultimate retirement with some proportional part of their pay of civil service employees who devote the best years of their lives to the government appears necessary to the maintenance of efficiency in the service, it cannot appear wholly just to the clerical force on the present limited salaries of these employees to establish the fund necessary for this purpose."

# The Pimple and the Face

First Show Signs of the Blood Poverty Which Threatens Skin Diseases.

It is a strange truth that pimples usually appear upon the face, thus indicating the blood is poor. The direct method of convincing man that the blood is filled with poison. The human circulatory system is said to be the most perfect of all evidences of nature. It carries health, food and strength to every part of the body, and also carries away the waste of the body all germ life, waste matter and decay. If through poor eating, indigestion, constipation, etc., the blood is filled with poisonous, decaying, irritating fluids, these poisons are carried to the lungs, where they are attempted to be cleansed by the oxygen from air inhaled. If this does not accomplish the result, the poisons are carried to the cells of the skin, where they leave it. Here these poisons irritate and decay the skin, and thus produce pimples, blackheads and other skin eruptions; at last bursting or are removed by medicine.

When you have pimples it is a certain sign your blood is wrong; that the great human blood system is turning into an intricate system of pus-filled canals which are filled with impurities.

Science long ago learned that Calcium Sulphide was the most powerful, harmless and beneficial blood purifier obtainable.

Stuart's Calcium Waters, under chemical tests, conclusively proved themselves to be one of the best methods of preserving the full strength of the blood, and thus the best blood purifier.

The real beauty of Stuart's Calcium Waters lies in their rapid work. Their good effects are noticed upon a few days' use, and a face full of pimples has been made clear and clean after only five days' use of these waters.

These waters, by the peculiar Stuart process, preserve and hold the full strength of Calcium Sulphide, so that the system obtains this wonderful purifier in its most efficient state.

Other methods of administering and preparing Calcium Sulphide have been tried, but Stuart's Calcium Waters to be the best method.

Go to your druggist and buy a box of these little pimple eradicators today. Price 50c. Write for your name and address and we will send you a trial package by mail free. Address: Stuart's Calcium Waters, 175 Stuart Bldg., New York City.
